

City of Polson Utilities

Irrigation regulations

Due to extremely hot weather which has resulted in high water usage, the City of Polson will be instating the sprinkling regulation. The regulations will remain in place until further notice. Odd numbered homes water on odd calendar days, and even homes water on even calendar days. If you have an auto sprinkler system, please reset it to come on between 12am-6am. Maximum of 3 hours of watering every other day. Thank you for your cooperation.

- Odd numbered homes water on odd calendar days 6am-9am or 7pm-10pm
- Even number homes water on even calendar days 6am-9am or 7pm-10pm
- Automatic sprinkling systems from 12am-6am

Maximum of 3 hours every other day, odd numbered homes odd days, even numbered homes even days.

We will announce a change in these regulations when the current temperature and current high water demand we are experiencing subside. Failure to comply, with the regulations, may result in your water service being disconnected and a charge to reconnect.
