

FLOOD HAZARD MANAGEMENT APPLICATION & PERMITTING CHECKLIST

- a. Publish notice at least once in a newspaper of general circulation to the area.
- b. Serve notice by first-class mail upon adjacent property owner.
- c. Send a copy of the notice and application to the DNRC Regional Engineer for review and recommendations.
- d. If the proposed project contains any alteration or relocation of the watercourse provide notice to DNRC, FEMA, and adjacent communities.

5. Additional permit criteria submitted.

- a. Does the proposed project meet the requirements of the minimum standards and criteria in Sections 7, 9, 10, and other requirements in 2014 Model Floodplain Regulations?
- b. Have all other applicable permits been received?
- c. Conducted site visit.

6. According to 2014 Model Floodplain Regulations, several criteria must be considered in deciding whether or not a permit is issued. They are listed below:

- a. Is a CLOMR needed? Yes No
- b. Proposed project meets minimum floodplain development criteria as outlined in the floodplain management ordinance.
- c. The danger to life and property due to increased flood heights, increased flood water velocities, or alterations in the pattern or flow caused by encroachments.
- d. The proposed water supply and sanitation systems, if any, and the ability of these systems to prevent disease, contamination and unsanitary conditions.
- e. The susceptibility of the proposed facility and its contents to flood damage and the effects of such damage on the individual owner.
- f. The likelihood that the structure of building will be threatened due to its proximity to the stream or potential lateral movement of the stream.
- g. The importance of the services provided by the facility to the community.
- h. The requirement of the facility for waterfront location.
- i. The availability of alternative locations not subject to flooding for the proposed use.
- j. The compatibility of the proposed use with existing development and anticipated development in the foreseeable future.
- k. The relationship of the proposed use to the floodplain management program for the area.
- l. The safety of access to property in times of flooding for ordinary and emergency services.
- m. Effect of the project on other properties.
- n. The effects on water rights.
- o. The cumulative effect of the proposed project along with other existing projects.
